"LIGHT FLOWERS"

DESIGNED BY
ALEXEY
SHEVCHUK
PRODUCED BY
ARTBUZ®

To create "LIGHT FLOWERS" we were inspired by the NATURE with its immeasurable fantasy in which we learn the balance of harmony and simplicity. The octagonal shape of "LIGHT FLOWERS" is an ancient symbol of the SUN - a symbol that gives protection and support in all good undertakings.

We designed two sizes of lamps for lighting different places: apartments, restaurants, office centers etc. Flowers can be used separately or harmoniously combined in large light installations. The lamps can be easily hung on the wall (using hooks) and create the "flowerbeds" of light panels that will become an emotional and decorative accent in the interior.

Fabric lampshades can be white or have two different colors. An amazing effect is given by the overlay of different colors of fabric lampshades, for example yellow and blue, when the light is turned on at the intersection of the fabrics turn the lampshade into a "watercolor" green.

In "LIGHT FLOWERS" with white lampshades, you can install LED RGB light bulb that can be programmed from a remote control, changing colors according to mood. Thus, this series of lamps, thanks to the open shape of the lampshade, performs the role of common and decorative lighting.

Collapsible design of the lamps is easy to assemble and doesn't require any tools, when disassembled it takes up small space and is handy for shipping.

TECHNICAL SPECIFICATIONS:

Material - steel / powder paint / light-scattering fabric lampshade (can be washed in a washing machine on delicate mode)

Lampholder	E26 / E27, 1 pc
Mounting	ceiling / pendant / wall
Adjustable suspension	standard wire length with ceiling cup - 70 inch (180 cm) standard wire length with electric plug in - 157 inch (400 cm)
