Pendant lights of series "LIGHTER THAN AIR" consists of original light flying vehicles that don't just fill the interior with light, but also make it extraordinary, cozy and memorable. Airy lamps look like real flying machines soaring at height, and its sculptural cheerful passengers that enjoy the flight enhance the charm and positive energy within the atmosphere.

The series has an educational mission, immersing connoisseurs in the history of the creation of flying objects by the genius Leonardo da Vinci, the Montgolfier brothers, Ferdinand Von Zeppelin - inventors who embodied the romantic strives of human for flight ...

- Pendant lights for most interior spaces: it could be an apartment, restaurant, office center etc - pendant lights match well with all interior styles. Light flying vehicles can be used separately or harmoniously combined in a large light installations creating the feeling of being at an aeronautics parade.
- A perfect kit that includes all the necessary parts for assembly (easy to assemble by hand without tools) and mounting which will take about 10 minutes (the product is completed with the assembly instruction, it also contains the address of the video instruction on YouTube).
- We designed and produced an unique assembly unit for the radial connection of wire details, which is the basis of our collapsible pendant lights, and reduced the packaging dimensions twenty times. The assembly unit is universal and fit with standard certified (UL/CE/UK etc) lampholders (light sockets) with thread on the body and a shade ring. The lamps are light and fit within the weight limits for certified cord sets which guarantees permission for use in different countries of the world. We also make our pendant lights from certified materials: fabric, metal and electroplating.
- We are constantly improving our products, therefore we reserve the right to make minor changes to the configuration, complete set, production technology and other attributes in order to improve its operational and aesthetic properties.
